

**District-Wide
Infrastructure Master Plan**

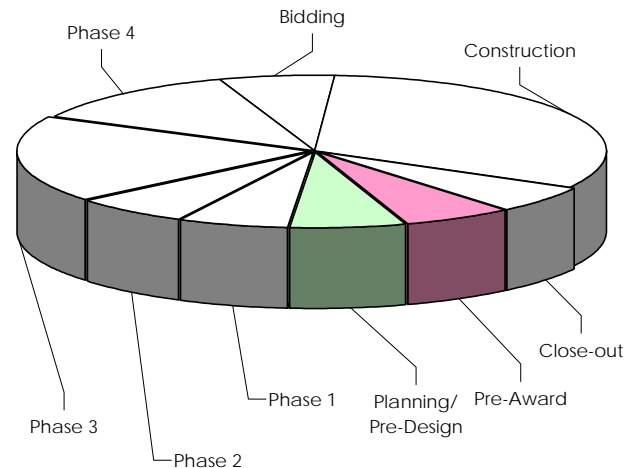

Status of Construction: Ongoing
 Architect: AC Martin Partners
 General Contractor: TBD
 Size: N/A
 Funding: Bond 'E'

DESCRIPTION:

In connection with the overall Bond Construction Program and other construction programs the infrastructure that serves the two campuses was evaluated and will be upgraded with new utilities and information technology to address current and long-term needs of Long Beach City College. The Infrastructure Master Plan is comprehensive and serves as the road map for phased construction over the next several years. Several projects including two new central plants and utility improvements both in-ground and within buildings at each campus have already taken place. Currently, antiquated utilities are being replaced on the north side of the LAC campus.

**Planning Phase
100% Complete**
