CTE Faculty in Action
Career Pathways Leadership Certification Training

In January, several CTE faculty, staff and administrators from multiple disciplines participated in two days of career pathways leadership training.

The Center for Occupational Research and Development delivered information and tools for developing and implementing career pathways for students. Training topics included:

- Economic Development Connections
- Community Teaming
- Programs of Study
- Integrated/Contextual Teaching & Learning

Participants had the opportunity to create career pathway development action plans for their areas and strategize on how to strengthen partnerships with K-12 and industry.

CTE Trivia: The Developing Programs of Study booklet (pictured/link provided on left) indicates that California has 15 Industry Sectors, 58 Career Pathways, and how many programs of study possibilities? The first three people to email careerteched@lbcc.edu with the correct answer will win a prize!
