

Westport-Kenworth GX and LNG System Training

This highly interactive 3-day course is devoted and geared to technicians and fuel handlers on safe driving, fueling and operating practices of today's liquefied natural gas (LNG) vehicles. This comprehensive course will also address the safety features of the LNG fuel storage and delivery system.

So whether you are a technician or fuel handler, or whether you are a manager or trainer for these employees, you will come away having learned all this information. Each attendee receives a notebook and a certificate of completion.

You will learn:

- Overview of Driver Training Program
- LNG Fuel System
- Fuel System Components— Theory of Operation
- Fuel system—LNG Pump and Hydraulics
- High Pressure Chassis Gas System
- Diesel Fuel System
- Fuel Delivery System
- Electronic Controls-PCM
- Electronic Service Tools
- Diagnosis and Repair

January 24-25-26, 2012
