Provide an explanation on how the district intends to fund the salary and benefit increases, and also identify the revenue source/object code)

The District intends to fund salary and benefit increases with current apportionment revenue (8611) and one-time funds from fund balance carried over from prior years.

On June 21, 2023, the Board of Trustees approved the Tentative Agreement with LBCCE/AFT (Classified employees). The agreement includes salary schedule increases for the next 3 fiscal years. For 2023-24 salary schedules are increased by the funded COLA, which is 8.22%. For 2024-25 and 2025-26 salary schedules will be increased by the funded COLA minus 1%. The funded COLA increases will be based on the enacted State Budget. Estimates presented here are based on the enacted Budget for 2023-24 and COLA estimates from the School Services Financial Projection Dartboard, 2023-24 Enacted Budget version for the subsequent two years.

On July 12, 2023, the Board of Trustees approved an 8.22% ongoing salary schedule increase for the management team effective July 1, 2023.

Did the district have significant events for the quarter (include incurrence of long-term debt, settlement of audit findings or legal suits, significant differences in budgeted revenues or expenditures, borrowing of funds (TRANS), issuance of COPs, etc.)?

NO

If yes, list events and their financial ramifications.

Does the district have significant fiscal problems that must be addressed?

This Year?

NO

If yes, what are the problems and what actions will be taken?

Next Year?

YES

The Governor was able to fund the 8.22% statutory COLA in the 2023-24 Budget, but due to declining state revenue, he had to make cuts in other areas like prior year block grants to do it. The state was expecting significant revenue in October due to emergency late income tax filing. However, the early reports show less than expected revenues. The Emergency Conditions Allowance (ECA) helped our apportionment funding, but the allowance ended June 30, 2023. It is challenging to manage and project future apportionment funding. For example, we have to be prepared for future apportionment funding increases that are below the funded COLA rates. State COLA's are applied to funding rates, but total apportionment revenue may be less than those percentages due to lower metrics due to the end of allowances or reduced FTES, completion and low-income students.

Prior year allocations are rarely cut in subsequent years, but this is an example of a strategy used in response to the cuts to state revenue. The governor's 2023-24 Budget does not allow for a recession, but that possibility exists. Inflation is leveling off. The UCLA economic forecast does not expect a recession, but they are modeling for a very weak economy for 2024 and 2025. Our large fund balance would help us weather mild downturns, but not a severe or long-term recession. Federal HEERF funding has helped districts through the pandemic, but that funding and the related indirect cost benefit to the general fund has ended. We have been able to use HEERF funding for forgiveness of student debt to help engage and retain students. Going forward difficult decisions loom on how to return to typical operations and collections of student debt. Enrollment is an ongoing concern. Outreach and efforts to re-engage students have helped increase total FTES. Our annual reported FTES for 2022-23 was up 5.68% from the previous year, but that is still down 7.50% from the pre-pandemic year of 2019-20. Fall 2023 semester enrollment increases are encouraging as we try to work back up to 20,000 FTES for large college base funding.
