

Wi-Fi

ACCESSING LBCC'S OPEN WI-FI

FOR LONG BEACH CITY COLLEGE **STUDENTS**

Overview

In this tutorial, you will learn how to:

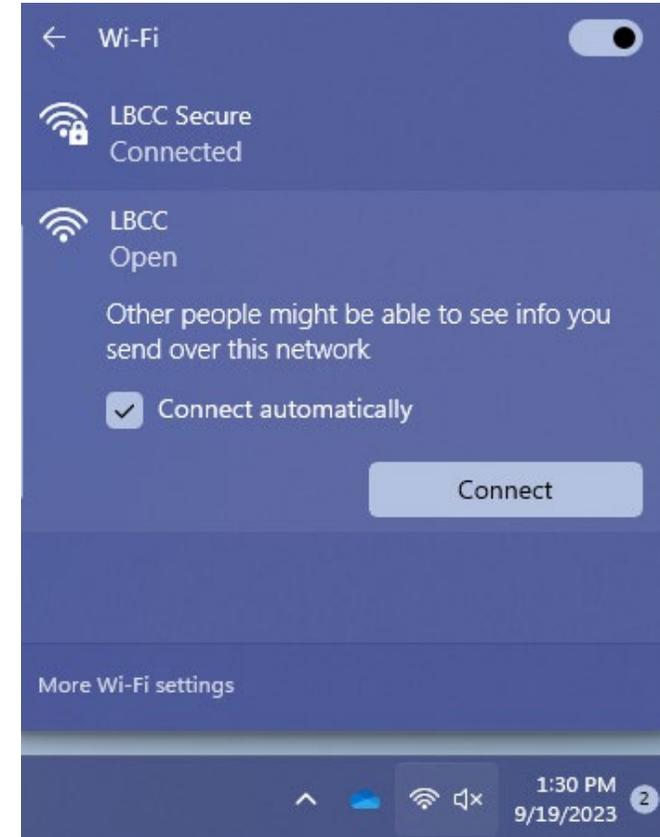

- Connect to LBCC's Wi-Fi on laptops and mobile devices.
- Troubleshoot your device should an issue arise with LBCC's Wi-Fi.

Connecting to LBCC's Wi-Fi

Open your device's Wi-Fi settings. For PC laptops and Chromebooks, this setting appears at the bottom right corner. For MacBooks, the setting appears at the top right corner. The image on this slide demonstrates the process on a PC.

Next, locate and connect to the **"LBCC"** network. You should now be connected to LBCC's open Wi-Fi.

The network titled "LBCC Secure" is reserved for LBCC staff members.

Having Trouble Connecting?

If you are having trouble connecting your device, try clicking **Forget this Network**. Then, repeat the steps from the previous slide to reconnect to the Wi-Fi. You may also want to try restarting your device.

Lastly, please keep in mind that increased user traffic can occasionally cause slower Wi-Fi speeds.
