

# Adjust Sound to HDMI for Classroom Speakers

These are the steps to change the playback device from Speakers/Headphones to HDMI.

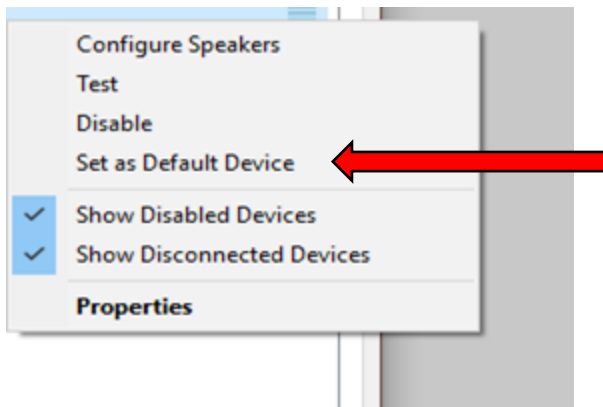

- 1) First, right- click the speaker icon on the bottom right of your screen

- 2) Click Sounds, then click Playback on top tabs like below

- 3) The first option should be the HDMI option, it may not look exactly like the icon above, or say "HDMI Device", but it will say HDMI somewhere in text.
- 4) Right- click the HDMI option, then select "Set as Default Device".

- 5) Once "Set as Default Device" is selected, it should play through the room speakers.
