## ABOUT LBCC'S ANTHROPOLOGY PROGRAM

The mission of Long Beach City College's Anthropology program is to present anthropology as the scientific global study of the biological and cultural aspects of humankind throughout time. This program will also prepare students to transfer successfully to a bachelor's degree program at the university level.

Anthropology is a broad field that appeals to students with interests ranging from genetics to social justice. Our program provides hands-on experience to explore the discipline and its countless uses. Training in anthropology will prepare students for any career that takes place in a multicultural setting.

## ASSOCIATE IN ARTS FOR TRANSFER (AA-T), ANTHROPOLOGY

The Associate in Arts for Transfer degree prepares students for a broad range of careers in which effective reasoning, research, and communication skills are essential. - Students will be required to complete no more than 60 units after transfer to earn a bachelor's degree
